CYBERNETICS
Volume 13, Numbers 1-6, 1977
(A translation of Kibernetika)

Volume 13, Number 1 January-February, 1977

	Engl.	Russ.
Brief Description of the Language RL-1 for Field Calculation by the Method of R-Functions – V. L. Rvachev, G. P. Man'ko, and A. N. Shevchenko	1	1
A Class of Data-Processing Systems Oriented toward Mathematical Investigations – A. A. Stognii, N. M. Glazunov, and G. P. Kozhevnikova	6	6
Local Characteristics of Post Algebras. II – B. A. Romov	11	12
Parametric Models of Languages Oriented toward Unambiguous Pr-Analysis – G. E. Tseitlin and E. L. Yushchenko	20	21
Elementary Automata with Memory with k-Valued Structural Alphabet – Yu. L. Ivas'kiv	35	36
Automata Manifolds – B. I. Plotkin, Ts. E. Dididze, and E. M. Kublanova	46	47
Certain Requirements on Program Packages for the Solution of Scientific and Technical Problems – I. N. Molchanov	54	55
Concerning the Realization of Schemes over Distributed Memory – V. N. Kas'yanov	62	63
Economical Algorithms for the Interpretation of the Algorithmic Language INCOL – L. F. Shternberg	68	69
Method of Machine Language Interpretation in the Development of Automated Debugging Systems for Special-Purpose Computer Software – V. V. Kosarev	74	75
Minimizing Exchange Volume in File Manipulation by Means of Optimal Cotrees – F. I. Andon and A. A. Zhmurov	88	89
Cut-Off Method with Space Extension in Convex Programming Problems – N. Z. Shor	94	94
Numerical Methods for Assemby-Line Balancing (Survey) – V. V. Shkurba and S. A. Beletskii	96	96
ε-Quasigradient Method for Solving Nonsmooth Extremal Problems – E. A. Nurminskii and A. A. Zhelikhovskii	109	109
A Method for the Minimization of Almost-Differentiable Functions – A. M. Gupal	115	114
Mathematical Model of Service Control in Network Systems – Yu. N. Shul'ga	118	117
Estimating the Number of Decision Coalitions – Yu. A. Shreider	128	126
Consolidation of Complex Systems (Methodological Aspects) – V. S. Korolyuk	131	129
Convergence of the Method of Conjugate Random Directions – L. D. Podval'nyi	135	133
SCIENTIFIC INFORMATION		
Third Republic School on Neurobionics – Yu. V. Paramonov	141	138

Volume 13, Number 2 March-April, 1977

A Method for Sequential Absolute Minimization in Mathematical Programming Problems – V. V. Ivanov and V. A. Lyudvichenko	143	1

Comparison of Two-Sided Automata with Respect to Operating Time and Decidability in the Problem of Functional Equivalence in a Certain Class of Discrete Transducers and Program Schemes over Memory – S. K. Shukuryan	152	9
Identity Problem for the Algebra of Regular Events over Semigroups – L. P. Lisovik	159	15
Two Methods of Sorting Elements in Data Files – E. P. Zabello	161	17
An Analog to the Additive System of Cardinals Connected with Finite Automata – S. I. Roizen	166	22
A Method for Constructing Combinational Circuits from a Single Type of Module – V. I. Korneichuk, V. P. Tarasenko, and A. K. Teslenko	174	30
Synthesis of Factored Forms from Input to Output – V. N. Bystrov and L. Ya. Lapkin	179	35
Architecture of Application Software Packages for Design Automation – S. L. Ambaryan, M. M. Adonts, and Yu. G. Shukuryan	187	42
Maximum Useful Number of Inputs to the Elements of Logical Circuits – S. V. Novikov and V. P. Suprun	191	47
An Approach to the Solution of Mathematical Programming Problems in Mixed Variables – T. T. Lebedeva, V. A. Roshchin, and I. V. Sergienko	198	53
Necessary Conditions for Optimality of Systems of Discrete Inclusions – V. V. Beresnev	204	58
Problems of Balancing and Varying of Dynamic Series in n-Dimensional Space – A. A. Alekseev	212	65
Optimization Results in Economics: Results, Difficulties, and Perspectives – L. V. Kantorovich and I. V. Romanovskii	215	68
Algorithm for the Minimization of Discontinuous Functions – A. M. Gupal and V. I. Norkin	220	73
A Problem of Nonstationary Optimization – E. A. Nurminskii	223	76
Evasion Problem on a Polyhedron – A. A. Chikrii and G. Ts. Chikrii	225	78
A Method for the Recognition of Graph Isomorphism – V. M. Kureichik and A. G. Korolev	230	82
An Efficient Algorithm for the Solution of the General Mathematical Programming Problem – É. I. Volynskii, T. P. Zhiteiskaya, and M. Z. Khenkin	236	88
Method of Control Sequences for the Solution of Equilibrium Problems. I – R. A. Polyak and M. E. Primak	241	92
Minimization of the Time for Executing a Project Given by a Tree – E. M. Gol'dgaber	253	102
Asymptotic Normality of Least Squares Estimates of the Regression Coefficients of Homogeneous and Isotropic Random Fields – N. N. Leonenko and M. I. Yadrenko	260	108
Limiting Distribution for the Time to First Loss of a Demand in a Queuing System with Semi-Markov Arriving Flux – V. A. Grishchenko	266	113
Synthesis of Automata Operating in Stationary Random Environments, Maximizing the Quantity of Information Contained in the Responses of the Environment – E. N. Vavilov and A. I. Ézrokhi	273	120
Distribution of Keywords in Text – V. V. Neshitoi	277	123
Filtering Problem for Isotropic Random Fields Observed on a Sphere – M. G. Al'-Madani	287	132
A Method for the Solution of the Assignment Problem with Nonlinear Stochastic Objective Function – V. A. Dolodarenko and É. I. Fedan	292	136
Whirl Decomposition of Stochastic Systems – A. Kh. Giorgadze, É. I. Kistauri, and A. G. Safiulina	298	142
Determination of a Polynomial Trend of Optimal Complexity – G. A. Akinfiev	300	144

	Engl.	Russ.
BRIEF COMMUNICATIONS		
Universality of a Class of Quadratic Integer Problems – V. A. Trubin	304	147
SCIENTIFIC INFORMATION		
Second All-Union Seminar on "Semantic Questions of Artificial Intelligence" – O. V. Iovenko and V. M. Perlii	306	148
Development and Practical Application of Methods for Finding New Technical Ideas and Solutions – G. S. Pospelov and A. L. Polovinkin	310	150
In Memory of a Scientist	311	151

Volume 13, Number 3 May-June, 1977

Algorithmic Completeness and Complexity of Microprograms – Yu. V. Golunkov	313	1
Automata Manifolds. II – B. I. Plotkin, Ts. E. Dididze, and E. M. Kublanova	328	16
Construction of Automata with Maximum Capacity for Self-detection of Failures – V. N. Valuiskii and A. M. Romankevich	338	25
Minus-Normal Sequential Calculi – S. A. Norgela	346	33
Criteria of Representability of Languages in Probabilistic Automata – Phan Dinh Diêu	352	39
Syntactic Properties of Recursive Program Schemes – A. V. Anisimov	365	51
Generalized Structural Induction – V. V. Bublik	375	60
Galois Correspondence between Iterative Post Algebras and Relations on an Infinite Set – B. A. Romov	377	62
Estimating the Effectiveness of a Multiple-Access Computer System by Analytical Modelling and Simulation – Yu. L. Sokolovskii	380	65
Investigation of Transient Processes in Closed-Loops of Automata – V. I. Levin	388	73
Investigation of the Operation of a "Processor–Peripheral" System – V. A. Popov, M. L. Litvinov, and A. L. Litvinov	396	80
Convergence of a Certain Algorithm for Programming Problems of Mixed Variables – V. A. Roshchin and I. V. Sergienko	400	84
A Method for the Analysis of Turing Computations. I – V. A. Moshchenskii	402	86
Optimal Choice of Auxiliary Input Signal to Increase the Sensitivity of a Measurement Instrument – A. M. Zakharin and F. M. Zakharin	412	95
Certain Problems of Stochastic Programming Arising in an Interactive Planning System under Conditions of Incomplete Information – V. M. Glushkov and G. B. Oleyarsh	418	100
Duality in Problems in the Optimal Control of Processes Described by Convex Multivalued Mappings – B. N. Pshenichnyi and I. B. Medvedovskii	423	105
Convergence of Algorithms for Finding Saddle Points – E. A. Nurminskii and P. I. Verchenko	430	112
A Class of Extremal Combinatorial Problems and Their Solution by the Method of Dichotomies – S. A. Beletskii	435	117
Parametric Decomposition of Extremal Problems – G. M. Levin and V. S. Tanaev	442	123
Certain Questions of the Arithmetical Interpretation of Nonoriented Graphs – Yu. G. Grigor'yan and G. K. Manoyan	448	129
Characteristics of a Deterministic System in Overload Conditions – M. L. Litvinov	452	132
Cellular Automata and Cellular Biological Systems – L. V. Reshod'ko, P. Kolarzh, and I. Grim	454	134
BRIEF COMMUNICATIONS		
Method of Identification in Extremal Problems – S. I. Lyashko and T. P. Levashko	466	147

Engl./Russ.

SCIENTIFIC INFORMATION

Fourth All-Union Conference on Mathematical Logic – I. S. Negru and G. E. Tseitlin . 469 149
All-Union Seminar on "Computer Systems and Structures" – G. E. Tseitlin. 473 151

Volume 13, Number 4 July-August, 1977

A Mathematical Model of Dynamically Evolving Economics – V. M. Glushkov and B. N. Pshenichnyi 475 1
Belts of Alternatives as Hierarchical Levels of Choice in Design Problems – V. M. Kapustyan and Yu. A. Makhotenko 482 7
Correct Algebras over Sets of Incorrect (Heuristic) Algorithms. I – Yu. I. Zhuravlev 489 14
Transformation of Operator R-Schemes to Yanov Schemes – V. I. Borisenko 497 22
Semantic-Context Grammars and Their Properties. I – V. Yu. Meitus. 502 27
Completeness of Axiom Systems in Algorithmic Algebras – G. M. Kirsanov and G. E. Tseitlin. 509 35
Asymptotic Solution of Quasilinear Differential Games – A. I. Tret'yak 512 38
Escape Problem for Bounded Phase Coordinates – A. A. Chikrii. 515 40
Neutrality of Controlled Objects – V. I. Ivanenko and V. A. Labkovskii 521 46
Minimax Filters for Nonlinear Systems – V. G. Klimenko 524 49
Minimax Approach to Recursive Estimation of States of Linear Dynamic Systems – N. F. Kirichenko and A. G. Nakonechnyi 527 52
Methods of Controlling Sequences for Solving Equilibrium Problems. II – R. A. Polyak and M. E. Primak. 531 56
A Class of Degenerate Nonlinear Extremal Problems and Methods of Their Solution – M. D. Maergoiz 539 63
Directed-Enumeration Methods in Integer Linear Programming with Boolean Variables – Yu. A. Zak 546 70
Planning Operations of a Multiprogrammed Computer – D. P. Bagdonene 557 80
Generalization of the Assignment Problem – G. V. Korablev and E. P. Andreichuk 561 84
An Algorithm for Optimizing Capital Investment Allocation, Using Boolean Variables – S. N. Kochura 565 88
Stationary Distribution Function for the States of a Generalized Birth-and-Death Scheme with a Symmetric Transition Graph – Z. G. Garifullin and V. A. Ivnitskii 569 92
Recursive Estimation of Parameter of a Nonlinear Regression Function – P. S. Knopov . . 575 97
Comparison of Sequential and Neyman–Pearson Criteria in the Asymptotic Case – A. M. Fal' 582 103
Stationary Characteristics of a Queuing System with Repeated Calls – V. A. Kapyrin . . . 584 106
Switching Processes – V. V. Anisimov 590 111
Synthesis of a Probabilistic Finite-State Grammar Describing a Given Set of Sequences – N. A. Esin and M. I. Shlezinger 596 116
Method for Optimal Cloth Cutting – V. A. Trubin and I. N. Grad. 601 121
Dynamic Models of Long-Term Regional Planning – V. A. Gorelik 606 125
Scheduling for Problems of Counterroutes – A. I. Babushkin, A. A. Bashta, and I. S. Belov 611 130
Algorithms for Solving Transport–Production Problems – E. L. Kaplan 617 136

BRIEF COMMUNICATIONS

Complexity of the Traveling-Salesman Problem in the Class of Monotonic Improvement Algorithms – V. G. Vizing 623 142
Existence of Continuous ε-Optimal Strategies for One-Step Models of Decision-Making – V. A. Tomilenko. 626 144
A Certain Class of Two-Dimensional Regular Iterative Systems – O. M. Revin 628 146
Parallel Composition and Decomposition of Finite Homogeneous Markov Systems – É. I. Kistauri 631 147

Engl./Russ.

ANNOTATION

Asymptotic Behavior of an Inhomogeneous Poisson Process with Leading Function Depending on a Small Parameter Controlled by a Markov Chain – V. V. Anisimov and V. N. Sityuk 633 149

SCIENTIFIC INFORMATION

School-Seminar on Methods of Automated Design Both of Program Preparation and Computer Devices – S. S. Gorokhovskii. 636 151

Meeting on Engineering Problems of Development of Chess Programs – Yu. V. Kapitonova. . 637 151

Volume 13, Number 5 September-October, 1977

Asymptotic Behavior of Stochastic Automata in Stationary Random Media – É. N. Vavilov, S. D. Éidel'man, and A. I. Ézrokhi. 639 3

Properties of a Class of α-Groups – L. B. Smikun. 647 12

Synthesis of Automata Given by a System of Integer Functions – E. N. Vavilov and R. N. Trofimchuk. 655 20

Number of Invertible Transformations in Multivalued Logics – E. A. Primenko 663 27

Self-complementary Types of Algebras of Multivalued Functions for Self-dual Transformations – V. A. Popov and I. T. Skibenko 666 30

Simulation of Not-Everywhere-Defined Functions of Algebra of Logic with Unreliable Realization – V. V. Tarasov. 669 33

Statistical Effectiveness of Algorithms Solving One Problem of Graph Vertex Partitioning – K. V. Shakhbazyan and T. A. Tushkina 674 38

Estimate of Efficiency of Various Methods of Sorting Digital Data Arrays According to the Quantity of Comparisons of the Elements – E. P. Zabello 680 44

Quasi-Positive-Definite Matrices and Their Applications – V. G. Mishutin. 684 48

Proof of Regularity of for Loop Operators – V. S. Kostyrko. 692 55

Microprogram Realization of a Syntactic Monitor for a FORTRAN Compiler for a Minicomputer – N. S. Polonskaya 697 60

Provision of Required Level of Reliability of Information Storage and Retrieval Systems – V. Ya. Basis and V. A. Parkhomenko. 700 63

Method of Minimization along Eigenvectors of a Matrix Close to a Hesse Matrix – B. N. Pshenichnyi and N. N. Redkovskii 705 68

Concept of Linearity and Convexity in a Discrete Space. Combinatorial Linear Problems. I – M. F. Kaspshitskaya and I. V. Sergienko. 713 75

Constructing Optimal Randomized Designs of Experiments by Linear Programming Methods – E. V. Sedunov, A. I. Trofimov, and N. G. Yakovleva. 720 82

Convergence of Adaptive Algorithms of Random Search – G. S. Tarasenko. 725 88

Analysis of Algorithms with Hessian Restoration from Gradient Values – V. I. Meleshko. . . 729 91

Convergence of Modified Method of Chebyshev Centers for Solving Problems of Convex Programming – M. E. Primak 738 100

Weakened Nonlinear Programming Problem and a Method of Penalty Estimates – É. I. Volynskii 741 103

Iterative Method of Teaching Discrimination of Infinite Sets – I. I. Eremin and Vl. D. Mazurov 746 108

Minimax Approach in Problems of Synthesis of Multidimensional Dynamical Systems – V. F. Zadorozhnyi, E. A. Nurminskii, and A. Yu. Stanishevskii. 749 111

Solution of a Generalized Problem of Partitioning of Sets – S. B. Katsev 754 115

Transformation of a Task-Complex Network into Its Conjugate – E. M. Gol'dgaber and V. G. Karnaukh 760 121

Limit Theorems for Randomly Halted Multidimensional Processes and Their Application to Analysis of Operational Systems of a Special Form – V. A. Anisimov and A. A. Voina 764 125

	Engl.	Russ.
Analysis of the Queuing System GI/M/m by the Method of Embedded Semi-Markov Processes – T. K. Kukhta	771	132
Convergence of a Difference Approximation of a Stochastic Darboux Equation – Yu. M. Ermol'ev and T. I. Tsarenko	774	135
Servicing Different Categories of Arrivals – L. Lakatosh	781	141
BRIEF COMMUNICATIONS		
Turing Machines Operating on the Plane and Stable Iterative Systems – M. I. Kratko and O. M. Revin	787	146
Simplicial Codes – E. I. Karpilovskaya	788	147
Continuity of ε-Subgradient Mappings – E. A. Nurminskii	790	148
SCIENTIFIC INFORMATION		
Imitation and Game Simulation of Human Behavior in Technological and Socioeconomic Processes – L. N. Ivanenko	792	150

Volume 13, Number 6 November-December, 1977

Twentieth Anniversary of the Institute of Cybernetics of the Academy of Sciences of the Ukrainian SSR	795	1
Theoretical Principles for Designing Discrete Systems – V. M. Glushkov, Yu. V. Kapitonova, and A. A. Letichevskii	799	5
Correct Algebras over Sets of Incorrect (Heuristic) Algorithms. II – Yu. I. Zhuravlev	814	21
Parallel Computations in Linear Algebra – V. N. Faddeeva and D. K. Faddeev	822	28
Use of the Method of Parametrization in Designing Processors for Dialogue Systems – S. N. Berestovaya, O. L. Perevozchikova, and E. L. Yushchenko	835	41
Performance-Improvement Research for Data-Processing Systems – I. V. Sergienko and V. V. Skopetskii	856	61
Design Methodology for the Territorial Multiple-User Computing Center of the Siberian Branch of the Academy of Sciences of the USSR – G. I. Marchuk and O. V. Moskalev	867	73
General Principles for the Synthesis of Hierarchic Multimodular Structures – V. M. Glushkov, Yu. L. Ivas'kiv, and V. L. Belyavskii	871	78
New Development Trends in Nondifferentiable Optimization – N. Z. Shor	881	87
On Necessary Conditions for an Extremum for Nondifferentiable Functions – B. N. Pshenichnyi	886	92
Convergence Rate of Methods of Conjugate Directions – Yu. M. Danilin	892	97
Limit Theorems for Reliability Theory – I. N. Kovalenko	902	106
Simulation of Distribution Optimization of Working Positions among Production Areas of Groups A and B – V. M. Glushkov and V. V. Ivanov	915	117
Cybernetic Description of Ecological–Economic Systems – N. N. Moiseev	930	132
Information Conversion Mechanisms in a Nerve Cell – Yu. G. Antomonov, A. B. Kotova, and O. G. Pustovoit	944	146
